

Zachary Willhide-James

Software Engineer

Software engineer with a passion for AI and ML, and expertise in building and deploying scalable, quality web apps.

WORK EXPERIENCE

Software Engineer | ZacWJ Devs

February 2021-Present

Summies

- Developed an app that summarizes any kind of article with just one click using the powerful OpenAI model.
- Utilized the advanced Redux Toolkit (RTK) Query for making API requests. These requests fire conditionally based on specific criteria, optimizing data fetching and management.
- Included a history feature allowing users to save summaries locally

Groceries

- Developed a full-stack web application using MongoDB, Node.js, and React to manage users' grocery data with cost, expiration dates, and types.
- Utilized React/Bootstrap to build a sleek responsive front end.
- Implemented Passport.js for authentication, enabling users to create individual accounts and securely manage their data.
- Designed and built a dynamic data table for users to input and manage grocery details, improving data organization and retrieval.

DessertAnatomy.com

- Created a website for a local Filipino food client with javascript, css, and html and transferred host from Wix to Nlify, eliminating cost for client to maintain website.
- Integrated emailing from website, increasing customer catering orders by ~20%.

SweetsbyTiffeny.com

- Created a new website for a local bakery client using HTML, CSS, and JQuery which enhanced customer traffic to website by ~60% and increased sales by ~30% on monthly basis.
- Integrated customer Instagram feed with Javascript.

Project Manager | Open Source Integrators

October 2021-May 2023

- Utilized Odoo ERP, leading and managing two "Go-Live" implementation projects, resulting in a 20% improvement in process documentation and integration.
- Managed and Coordinated four client-facing software development teams using Odoo, consisting of 5-7 developers resulting in over \$13 million in revenue.

Financial Accountant | Yaamava Casino

August 2018-Oct 2021, May 2024-Current

- Played a key role in the adoption of Infor Financials and Supply Management ERP, leading User Acceptance Testing (UAT) and creating comprehensive documentation, contributing to a 25% increase in user acceptance.
